

# KYIV

## ANNUAL REPORT 2021

*We continue transformation  
in Kyiv, changing our city,  
making it beautiful and  
comfortable  
European capital*

## Dear friends!

Summarizing the results of 2021, we can describe it as special for the capital development.

This year was marked by dynamic development and economic growth for Kyiv. The capital's budget income amounted to UAH 65 billion, which is a record figure for recent years. In the real economy sector, there was an increase in exports, volumes of capital and direct foreign investments, despite significant quarantine restrictions due to the coronavirus pandemic. The average monthly wage, which at the end of the year reached UAH 20.6 thousand, which is 1.5 times higher than in Ukraine, also continued to grow. The number of square meters of housing and non-residential buildings was increased by 2.3 times as compared to 2020. The dynamics of single tax revenue from legal entities and private entrepreneurs to the city budget improved.

During 2021, Kyiv city authorities continued to solve urgent issues in order to increase the comfort and safety for citizens. Round-the-clock monitoring of fresh water quality and a modern system of atmospheric air quality monitoring were implemented; the budget economy infrastructure was improved, modern energy-saving system of city streets illumination was provided, 70 km of heat networks were renovated.

Even more new buses, trams, and trolleybuses have appeared on the capital's municipal public transport routes. In addition, in the coming years, due to the loan agreements signed with the EBRD for 50 million euros with the goal of purchasing metro coaches and for 100 million euros with EBRD for the purchase of trolleybuses and metro coaches, Kyiv's public transport will become even more comfortable.

Also, this year the city government continued to upgrade the road and transport infrastructure. Thus, the road traffic on Kyiv streets has become more orderly in terms of priority: pedestrian zone - cycle paths / cycle lanes - parking areas/ bays - carriageway. Totally, 185 km of bicycle paths and lanes have been already built in the city. We modernized the network of high-speed tram lines from the Oxygen Plant to Hnata Yury Street, completed the construction of new stops at the "Zholudeva" and "Bulgakova" stations, and completed the renovation of the "Industrialna" station. In total, 198 road infrastructure objects were renewed in Kyiv in 2021. The traffic line between the right and left banks of the Dnipro River has been optimized due to the implemented logistics strategy for unloading of road traffic. The number of sky stops in the capital has increased. The map of suburban railway connections and services has been considerably improved.

Urban areas and services have become more accessible to all categories of citizens due to the active development of exclusive environment. Many barrier-free areas have appeared in the city: Arsenalna Square, "Natalka" Park, Mariyinsky Park, Lebedine Lake Fitness Park, Maksym Rylskyi Park, and a park near Berkivshchyna Bay. As for the needs of people with disabilities most of public facilities were re-equipped with tactile tiles, ramps, reduced curbs, and elevators.

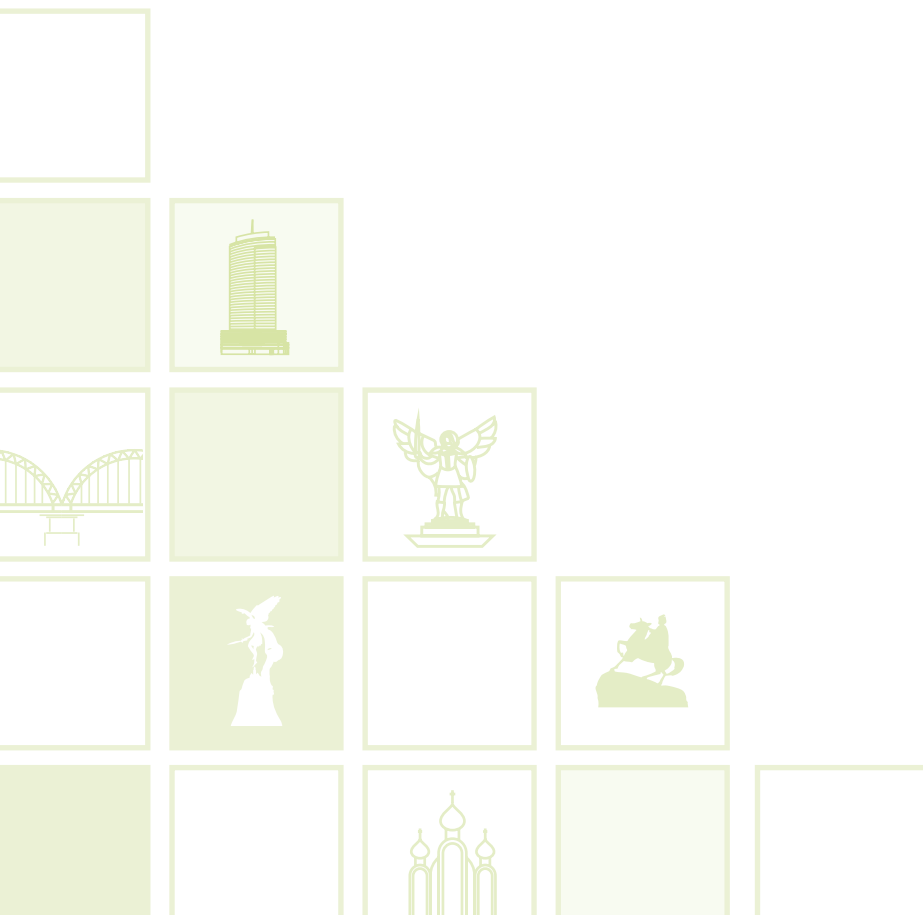

They also continued to update sports infrastructure facilities. In addition, capital repairs were completed at "Yuny Spartakovets" and "Champion" children's and youth sports schools. The sports fields on Kashtanova Street and in Kvitnevy Lane, the new football field under the auspices of the "Real Madrid" Foundation's social and sports school were opened. Thus, over 1.2 million citizens used the "Kyiv Digital" application in 2021.

Unfortunately, all these positive changes and achievements of year 2021 were "put on pause" by Russian large-scale military invasion of Ukraine on 24 February 2022. This barbaric war made adjustments to the implementation of plans for transformation in the capital.

The Kyiv city authorities faced other challenges and tasks after shelling damaged residential buildings, industrial facilities, logistics, and other infrastructure objects. The major goal now is to withstand the confrontation with the enemy, to ensure the efficiency of the city's life activities.

**Glory to Ukraine!**

**Kyiv City Mayor  
Vitaliy Klitschko**

## Kyiv is the capital of independent Ukraine

INDEPENDENCE. Since 1991 and forever

**22 January 1918**
